

## Procedures for Connecting to Faculty/Staff/Student/Guest Wireless Networks.

There are **3** networks on campus.

1. **MABTS-Faculty**
2. **MABTS-Students**
3. **MABTS-Guest**

All Faculty and Staff should use the **MABTS-Faculty** network. Other networks are reserved for the intended users.

To connect:

1. Select (click) the required network
2. Input your user *Network Access credentials* (username and password used to log on to email)
3. Accept the certificate

Students will use the same process faculty but are limited to the **MABTS-Students** wireless. This network has other limitations such as decreased bandwidth and streaming limitations.

Guests should always use the **MABTS-Guest** network. This network requires no username and password. However, there are limitations set on what can be accessed.

**All networks are secured and content filtered.** Additionally, all Guest network access requires users to accept a "Terms of Use" policy. All students and faculty must comply with the "accepted use" policy found in the catalog.
